

Connecting people  to businesses

RAINBOW CONNECTED

WHAT WE DO, SIMPLY...

Rainbow Connected is the No 1 lead management and contact centre for the insurance sector. Our contact centre offers unrivalled results in speed and success of connecting insurers and brokers with customers. With many companies purchasing data from the same source, it is imperative to reach the applicant before the competition.

WE CONTACT

Previously insurers and brokers would manage the whole process, trying to contact, quote and retain their customers. With so many procedures in place it meant they were slower to contact customers and monetise their data.

Rainbow Connected has revolutionised this process and offered an unrivalled service to the insurer and broker.

What we do is simple, with our sole focus on the 'contact' of the customer. Our bespoke C2C system and professionally trained team of agents has established us as No 1 at what we do and no one does it better.

FOCUS ON SALES

With Rainbow Connected managing the 'contact' of the customer, this means the insurers and brokers are free to do what they do best - 'quote' the customer. Rainbow Connected can manage all aspects of the clients data, whether it is a live data feed, the clients quoted diary or the clients historical and renewal database.

With Rainbow Connected acting as their contact centre it means our client is solely able to focus on quoting for new business and in turn converting more 'live hot key transfers' into sales.

Many of Rainbow Connected's clients have initially started with a trial campaign, targeting one product type. With our agents taking over the 'contact' of the customers on behalf of the client.

We have found that this approach gives our clients a chance to measure the success and analyse conversions. This we have found is the beginning of the journey for them, instantly benefiting for an uplift in the number of customers they talk to and sale conversions. So what starts as one campaign, quickly grows to us managing all of their data.

"An instant win for the client"

Simple

"It costs nothing to speak to us, call us now and see how we can help convert your data"

0800 812 1056

1

CALL PURCHASE

Live leads, filtered to your specification as a hot key transfer. We offer a tailored service, connecting your agents to pre-qualified customers to run through an immediate quote.

2

LEAD EFFICIENCY PRODUCT (LEP)

Our contact centre offers unrivalled results in speed and success rates in managing your lead efficiency campaigns. Calling your customers within seconds of application and providing you a hot key transfer to quote immediately.

3

INSURANCE AGGREGATOR SOLUTION

Giving insurers and brokers a second bite of the cherry, adding this personal touch of our contact centre to re-engage with customers that didn't click through to take the quote, which enables insurers and brokers to offer further discounts to seal the deal.

4

DIRECT DEBIT FAILURES

Exactly what it says on the tin. We work on behalf of a Broker's accounts team to rectify a monetary problem.

5

RENEWAL CHASING

A big part of Brokers income is from customer retention; once renewal documents have been sent out, Rainbow Connected contact any customer that hasn't responded through the normal process.

6

QUOTED DIARY

We work our client's diaries. We can help a Brokers sales force to organise and get hold of hot quotes to try and close the sale.

7

CALL EXCHANGE

Every insurer and broker is faced with customers that they are simply unable to quote, our Call Exchange product allows your agents to send us customers, via a live call directly into our contact centre. Our agents will then enter the details into our bespoke system and match them to one of our clients that can quote and in turn remonetise this data for you.

“ CONNECTED ”

HOW THE CONCEPT WAS BORN

In the words of our Director, Andy Dean

Rainbow Connected's concept was born in October 2010 after being approached by an insurance broker to generate live 'Google' leads to be contacted by their in-house call centre.

To enable the client to gauge the quality of the applicants a 'free test' of 10 leads was agreed. Seventy two hours later our team called the client to find out the test results. From the 10 test leads generated the client's response had been "Sorry we couldn't get hold of them, NOT for us".

Stunned and bemused we had a member of our own staff call the leads there and then, the results were the beginning of the company. Contacting seven of the leads immediately, with five of them wanting a quote there and then!

We knew at that point that we could deliver "hot key calls" to our clients as one of our services.

On that day the seed for our Contact Centre started to grow! We now deliver multiple products and services, with dedicated teams in place managing individual insurer's and broker's needs.

Rainbow Connected has an experienced management team in place, with expertise in Advertising, Digital Media and Call Centre Services. Our large IT team work on both our internal proprietary software systems as well as our web activity meaning we are at the forefront of our digital age.

One of our key factors is that we provide excellent management Information to all our clients that are above and beyond the norm. Today Rainbow Connected generate thousands of calls a day for our ever growing contact centre, and the growth continues.

RAINBOW CONNECTED TECH

WHAT WE DO AND HOW WE DO IT

Since early 2012, Rainbow Connected has made significant investment in its tech infrastructure and here is what we do best.

OUR CRM TECHNOLOGY

In 2012 Rainbow Connected decided not to buy an off the shelf call centre system but design its own. We called it Click 2 Call (C2C).

Six years on and we now have a full reporting direct dialling CRM system. Designed and maintained by our software developers based in Sofia, Bulgaria. If we need a new element added then a spec can be written, designed and implemented in a matter of days.

Our team are forever rewriting elements to make sure the program runs faster than anyone's in the market. Ensuring our tech is at the best it can be so our Agents are dialling and speaking to customers before any of the competition.

2019 will see us adding Computer Learning and Artificial Intelligence to help us gain an advantage on others in the industry.

WEBSITES & APPS

As a group we have been building websites since 1996. We currently have hundreds of websites generating leads for our clients. The list of websites range from Car insurance, HGV insurance, Motor Trade insurance and many more.

We employ a full time SEO expert as well as access to a team of developers who work in the Group based in Sofia, Bulgaria.

With over 120 Apps on the Google Play or Apple App Store, the majority of these are for insurance and financial products that generate the group 1,000's of leads per month.

With IOS and Android developers in our team, changes and upgrades can be made easily. We pride ourselves as always being at the top of our game. Creating and keeping up with the new technologies that go with building apps.

SECURITY

All Rainbow Connected's database servers are located in our server farm within our own network and data centre. Protected by our own firewall on our dedicated leased line internet connection.

Rainbow Connected utilises server virtualisation to maximise resources and minimise downtime. Our data centre is fully air conditioned with redundant power supply to protect from power outages and surges. All servers and equipment are regularly patched and updated to maximize security. Back ups are taken every night to our own backup vault and replicated to our Bulgaria office.

All data is transmitted over secure, encrypted channels. Facilities are managed by Rainbow Connected's internal IT support team. By using our own facilities and support staff, we can vet all staff coming into contact with the data. As an additional security measure the use of hand-held devices within the call centre are controlled and our wireless network is protected by WPA2 encryption and the pass phrase regularly changed to minimise the risk of unauthorised access.

ARTIFICIAL INTELLIGENCE

With computer science and artificial intelligence playing a big part in the insurance industry and certainly in tech. Rainbow Connected has invested heavily in specific developers to make our system work intelligently.

Our specially built program will be able to analyse data, giving us a better insight of when leads are best to be called and even validate customer details.

Our software is definitely 'disruptive technology' and will have a huge impact on how we manage our and our clients data. Our developers hope to be beta testing this in the first quarter of 2019 to be fully functioning by mid 2019, giving Rainbow Connected a massive advantage over our competitors.

COMPLIANCE & GDPR

DATA

We only use data for the purpose that it was intended. We never cold call, and only contact for marketing if explicit consent is given. Whether it is live, historic or purchased data we always follow our due diligence procedures in order to maintain full compliance with the data we are processing.

PRIVACY BY DESIGN

As we have designed our own bespoke C2C system, we have been able to make sure that GDPR is at the forefront of our continued development. We are able to record and report Data Subjects preferences for contact, emailing our Privacy Notice with a click of a button, along with anonymisation when opting out.

DATA SUBJECT RIGHTS

Full transparency is our goal, all Data Subjects have full rights under GDPR, and Rainbow Connected has procedures in place to fulfil any data requests promptly. Our system allows us to trace a leads origin and report back any linked leads allowing for full disclosure.

QUALITY LEADS

Rainbow Connected pre-qualify leads before transferring them through for a quote. This enables us to firstly check the data is correct and up to date, and allowing the Data Subject to amend any information. Secondly it lets us match the Data Subjects requirements with the insurer or broker that best suits them, ensuring quality leads are delivered and benefiting both parties.

Our in house compliance team are always striving for more knowledge and ongoing training to ensure full FCA and GDPR compliance.

BREACHES & ALERTS

Security is always our top priority, our IT team work tirelessly to ensure personal data is in safe hands. However, we also understand that no one is infallible and we have procedures in place should a data breach occur. Rainbow is equipped to report any attempted or actual data breaches to the Data Subjects, the lead sources and the ICO.

Based on completion of our Legitimate Interest Assessment we have concluded that we process personal information using the lawful basis of Legitimate Interests.

We have decided on this basis as it allows us to meet with the ICO and FCA rules and is the most suitable lawful basis for processing data with a view to arranging a financial services quotation for our customers.

HOW WE WORK WITH YOU

STEP BY STEP

- Meeting to outline campaign requirements and current conversion rates from the data.
- A proposal is drafted outlining our suggestions based on what you have told us.
- Once both parties agree the proposal documents they are sent to Admin and Compliance.
- Compliance will liaise with your team and sign off all relevant checks etc.
- Admin will arrange for TOBA's to be drafted and sent for both parties to sign.
- IT will be instructed to sort delivery of data and any technical integration needed for us to start the campaign.
- Start date is agreed for the test.
- An account manager will be allocated to you where they will talk to you daily to sort issues and update you on performance.
- You will be sent weekly/Bi-monthly reports.
- At the end of the test another meeting will determine if both parties are happy and on agreement a long term relationship will be entered into.

We look to agree commercial terms after running an initial trial period. During this trial period we evaluate the return on capital (ROC) that our clients enjoy from our activity. We would then commence with our formal contract which would outline both the cost of each campaign and also all of our formal data responsibilities. We have a rigid follow up protocol where we would expect to have monthly reviews with each client which formally review performance and a number of mutually agreed KPI's.

RAINBOW CONNECTED UNDERTAKES INITIAL CHECKS WITHIN 48 HOURS OF TEST GOING LIVE

To ensure the campaign is running smoothly and to guarantee maximum performance from the outset

CHECKS UNDERTAKEN

- Data Delivery
- Data Compliance (data is what it says)
- Customer Journey (listening to calls to ensure the customer experience is seamless)
- Quality of data (does it fall in line with other campaigns)
- Speed (are we contacting the data quick enough)
- Pick Up (is the client answering quick enough)
- Conversion (campaign results – is it performing as expected)

REGULAR REPORTING

RAINBOW CONNECTED

THE NO1 CONTACT CENTRE IN THE UK

VISION

Rainbow Connected wants to 'set the standard' within our industry, and not 'be standard'.

Setting a level of excellence, constantly perfecting our services to exceed our client's expectations.

Our concept is a simple, our dedication, innovation and constant drive to improve keep us fresh and open to change.

To Rainbow Connected coming second is not an option.

VALUES

We believe that working as a team is essential to provide a professional and excellent customer service to our clients.

Rainbow Connected believes in going the extra mile, making ourselves accountable to our clients by ensuring we meet their targets and never failing to meet the commitments made.

We pride ourselves on our reputation for professional excellence.

GOALS

To expand the business and double our capacity by the end of 2019.

We want to attract and retain the highest level of agents to make our business stronger and a centre of excellence.

Continuous development of our bespoke software and systems to ensure we stay at the forefront of our industry.

**"NEVER STANDING STILL,
EXPANDING OUR SERVICES
TO KEEP THE BUSINESS
FRESH AND RELEVANT."**

OUR CLIENTS AND THEIR TESTIMONIALS

Rainbow Connected is one of the largest insurance contact centres in the country, working alongside the largest insurers and brokers within the industry. We have nurtured long term and deep relationships with our clients, as we believe our commitment to meet their needs has been paramount to our success.

Here's what a few of our clients had to say:

Steve Murphy

Director of Commercial Trading

"Rainbow Connected have been a valued partner of Autonet for a number of years and have continued to support our business in delivering quality leads on a range of product lines as well as being a partner of choice for outbound call campaigns."

Rachel Aston

Group Marketing Director

"We have worked with Rainbow Connected for a number of years and have seen a significant uplift in our conversion rates as a result of their work. Their friendly team are on hand to help us optimise our campaigns and assist us when needed with additional lead generation from other sources. I would highly recommend them to other businesses looking to monetise and optimise their leads."

"We have worked with Rainbow Connected since September 2017 and have seen our contact rate increase since using them. Thanks to Rainbow

Connected we are placing more units that we were before. Our account manager is easy to work with and quick to adapt to any requests which enhance the customer journey"

"We have been working with Rainbow Connected for a number of years and I would like to say a huge thank you to the team. Not only have they been reliable, but also profoundly helped us as a business to grow and reach our full potential with the quality of the leads they provide, to the additional services which help us connect with more of our customers. From their expertise in the insurance industry, to their willingness to help in small tasks - their efforts never go overlooked and are greatly appreciated. "

Andrew Evanson

Senior Operations Manager

Courtney Goddard

Lead Campaign Manager

F.A.Q.

1 HOW DO WE SEND THE DATA TO RAINBOW CONNECTED ?

Rainbow Connected takes care of this for you, our IT team will support you through each step, whether the data comes direct from your own system or a 3rd party provider. They will guide you through the complete data integration process, it doesn't matter what format the data is in, our experienced IT team are there to manage the safe, secure delivery of your data into our bespoke system to call on your behalf.

2 MI REPORTING, HOW OFTEN WILL I RECEIVE AN UPDATE?

This will be dependent on the campaign type, live data campaigns are updated daily, giving the client access to their own reporting folder to look at when they need to. The MI summarises the gross data in, the percentage of data that is not contactable (i.e. a duplicate lead/wrong number), how many calls have been successfully transferred across on the campaign and the conversion rate for the campaign. However full lead and transfer details are included within the report to assist the client with looking at individual lead type performance. The MI for renewal and historical campaigns are typically updated weekly as these are usually delivered in a CSV file format rather than a daily feed.

3 WHO DO WE CONTACT IF WE HAVE ANY PROBLEMS ARISE?

Each client has a dedicated account manager to contact should there be any issues arising with your campaign. You will be introduced to your account manager from the outset and they will work closely with you to iron out any teething issues and manage any urgent requirements you may have, i.e. should you have staff shortages or system issues. We can manage these for you by staggering or pausing calls whilst these issues are resolved. They will be your first point of contact and will assist in resolving any queries you have.

4 WHAT HAPPENS IF THE CAMPAIGN DOESN'T PERFORM AS RAINBOW CONNECTED PROMISED?

Rainbow Connected is confident in the service we provide, our team is dedicated to delivering a great customer journey, ensuring that we are compliant with our scripting and our bespoke C2C system ensures we beat our competition to the customer every time! Clear data conversion targets are set with the client at the beginning of the campaign. Rainbow Connected will guarantee that if we don't meet the agreed minimum target then our services will be free of charge to the client, that's how confident we are!
